

Parking Guidelines

- There is a lot of space on the property but please park only in designated areas as shown above.
- Do not park next to or in front of a telescope pad if you are not using it (refer to pad use rules).
- Do not park in the central portion of the camping areas.
- **Parking at the houses:** Parking inside the fence around either house should be reserved for loading and unloading only. Please do not park overnight in these areas.
- **Early departures:** If you plan to depart GMARS while it is dark, please select a parking spot toward the south end of the property. Back into an available space so reverse lights do not disturb dark-adapted observers and imagers when you depart. Exit only at the south driveways. Be courteous and careful at all times when operating your vehicle.
- Some vegetation is shown on this map for your convenience. Obviously, there is much more than shown here. All vegetation, especially yucca trees, must be left undisturbed as much as possible.
